SD MEAH

The Company

Eezdee Intrade Sdn Bhd (Eezdee) is mainly involved in the export of consumer food and industrial food products worldwide.

We aim to be the most reliable and effective Malaysian exporter of Halal food and consumer and industrial products with a strong and reputable presence in Muslim society.

With over 30 years of valuable experience and credibility, Eezdee's founder has been acknowledged and accepted as a reliable, efficient and effective trader, exporter and supplier of palm oil and dairy products in the global marketplace. In 2018, our company established a sister company, **SD MEAH FZ-LLC**, in the UAE to expand our global presence.

Our expertise includes processing and exporting consumer-packed foodstuff comprising oil and fat products and other commodities such as cereals, grains, sugar, oil seeds, beans, pulses, drink mixes, coffee beans, baking supplies, and condiments.

We are committed and confident towards reaffirming our leading role as a significant player in the industry. With our suppliers' collaborative efforts and support and highly dedicated management team and staff, we will continue delivering our customers the best product and service value.

Vegetable Cooking Oil

RBD Palm Olein

RBD Palm Olein is the liquid fraction obtained by the fractionation of palm oil after crystallization at controlled temperatures. It is especially suitable for frying and cooking. The liquid olein is products of fractionation, and they are the major products exported. Main applications of RBD Palm Olein include salad and cooking oils in households, industrial frying fat of instant noodles, potato chips, doughnuts and condensed milk.

HPKO Hydrogenated Palm Kernel Oil

Palm kernel oil comes from the seed or kernel of the oil palm fruit. Its composition is close to that of coconut oil, with roughly 82 percent saturated fat and 18 percent unsaturated fat. Many well-known foods contain hydrogenated palm kernel oil including baked goods, baby formula and crackers. Hydrogenated palm kernel oil contains fewer trans fats than other hydrogenated oils. Because palm kernel oil is already high in saturated fats, manufacturers need not hydrogenate it as thoroughly as other oils like soybean oil. This limits the created trans fats.

Coconut Milk Powder

Coconut milk powder is made from the best quality of coconut milk, hygienically processed and dried to a consistency of fine powder sprays. Natural as it contains no preservatives and no artificial flavour. Coconut milk powder comes in a packet as a fine white powder. In essence, it is coconut milk which is dried to make it a more versatile and long-lasting option. Coconut milk powder is used either in its basic form, added directly to soups, smoothies, curries and sauces, or is reconstituted.

Baking Supplies

Custard Powder & Corn Flour

Custard powder is a flavored mix used for making creamy custard desserts, available in various flavors. Corn flour, derived from corn kernels, acts as a versatile thickening agent, forming a smooth mixture when combined with water. It's commonly used to thicken soups and sauces and serves as a gluten-free option in baking for a light texture in both sweet and savory dishes. While custard powder is tailored for desserts, corn flour has a wider application in culinary settings.

Instant Juice Powder

Fruit juice powders, there are basically concentrated fruit juice dehydrated by spray-drying method. A Fruit juice powder is a powder made from the juice of fresh fruit and then dried into a fine powder. One must not get confused between fruit powder and fruit juice powder as the two are totally different. Fruit powders are made from drying the whole fruits while fruit juice powders are made from drying the pure juice. Juice products can be used in drinks, dressings, marinades, desserts, smoothies etc.

Float Juice & Vimo

Float Juice is a range of juice drinks containing real fruit pieces and is available in orange, peach, mango, pineapple, guava and grape varieties. Made with real fruit chunks with no artificial colors. So, you can enjoy real fruit juice content.

Vimo Cordial is a non-alcoholic concentrated syrup used in beverage making. It is usually fruit-flavoured, made from fruit juice, water, and sugar or a sugar substitute. It does not contain unhealthy fat and cholesterol. All the health benefits which can get from fresh fruits can be gained because fresh fruit pulp is added into the mixture.

Tomato Paste

Tomato paste is added to dishes to impart an intense flavour, particularly the natural umami flavour found in tomatoes. Examples of dishes in which tomato paste may be commonly used include pasta sauces, soups, and braised meat. The paste is typically added early in the cooking process and sautéed to achieve caramelization. It has similar nutritional value to fresh tomatoes, since it's simply the essence of tomatoes in concentrated form.

Ketchup

Ketchup is a table condiment with a sweet and tangy flavor. Ketchup is most often used as a condiment to dishes that are usually served hot and are fried or greasy french fries and other potato dishes, hamburgers, chicken tenders, hot sandwiches, meat pies, cooked eggs, and grilled or fried meat. Ketchup is sometimes used as the basis for, or as one ingredient in, other sauces and dressings, and the flavor may be replicated as an additive flavoring for snacks, such as potato chips.

Vinegar

Vinegar is a combination of acetic acid and water made by a two-step fermentation process. is an aqueous solution of acetic acid and trace compounds that may include flavorings. It is used as a condiment to add flavor or as a preservative, as in pickling. Vinegar contributes acidic notes to foods, both in aroma and taste. It also "cooks" foods with its acidity by breaking down their structures and softening their textures.
